

## MEMORANDUM

Date: May 15, 2020

To: TLRC Six-Plex Residents

From: R Kevin McFeely, President & CEO

Re: Masks and Visitors

Now that Governor Inslee has released his four-phase reopening plan for the State of Washington, we are seeing more people outside, both on the TLRC campus and in the greater community.

Regarding walking around the TLRC campus, I encourage you to do so as springtime brings great beauty to our campus and it is for all residents to enjoy. However, it is important that while outside of your respective Six-Plex you wear a mask. With more and more of our residents taking advantage of the nice weather and being outside, this request is important to protect the health and safety of everyone.

In addition, I am aware of visitors coming to your individual Six-Plexes, I need to remind you there is still a Stay at Home order in effect for the State of Washington and this practice is a violation of this order. In addition to this, I am told many of these visitors are walking around the campus and not wearing a mask. This must stop immediately-if you choose to have visitors, they must stay at your respective Six-Plex and not walk around the campus. I am also requesting the visitor wear a mask while visiting with you.

We are now scheduling trips to the State Parks for our Six-Plex residents. Buses will not be filled to capacity in order to maintain social distancing. Because of this, we will schedule frequent trips to give everyone who wants to participate in this activity an opportunity to do so. Masks will be required while riding the buses and while visiting the parks. Fortunately, the parks are not crowded at this time so maintaining distance from other people should be easy to comply with.

Again, we have remained COVID-19 free because of the protocols put into place and we are constantly monitoring guidelines from Center for Disease Control and

Prevention (CDC), Centers for Medicare and Medicaid Services (CMS), Department of Health (DOH) and the Governors Press Conferences to keep up-to-date on what is allowed and what is not. Please know it is our intent to open up our campus as much and as quickly as possible without risking anyone's health and safety.

Thank you for your continued understanding and adherence to these guidelines. Please do not hesitate to contact either Brita Carpenter or myself should you have any additional questions.
