

## MEMORANDUM

Date: June 3, 2020

To: TLRC Residents and Employees

From: R Kevin McFeely, President & CEO

Re: Updated Test Results Information

As we continue to receive COVID-19 test results, we have learned seven (7) of our Health Center resident's tests came back positive. They initially were reported as non-conclusive but later deemed positive. I recognize this is confusing, but it is the way these results are sometimes reported. As previously shared with you, we began isolating the residents whose tests came back positive and as of this writing, have isolated all of these residents. I also think it is worth noting without exception, each of these residents were asymptomatic.

We will continue the protocols already in place. This includes checking temperatures of staff and residents as they enter the main building. In addition, we began testing all TLRC staff yesterday and expect to start receiving test results tomorrow. In the meantime, we have stopped admitting new residents to the Health Center. We continue to work with the Tacoma-Pierce County Health Department on managing this situation and utilizing staff members throughout the Health Center in a way that is safe for everyone along with ensuring residents continue to receive the high quality care and services they deserve and are accustomed to.

I appreciate the fact this is a fast moving, fluid situation. Please know we will continue to update you as we receive information. Our overall goal continues to be keeping our residents and employees safe and healthy. Your understanding and support of the work being done here is appreciated. I hope you too remain safe and healthy and please watch for further updates.

As always, please do not hesitate to reach out to Brita Carpenter or myself should you have any questions.

Thank you.
