

## MEMORANDUM

Date: November 29, 2020

To: TLRC Residents, Family Members and Employees

From: R Kevin McFeely, President & CEO

Re: COVID-19 Additional Update

Today we were notified one of our Assisted Living employees tested positive for COVID-19. Therefore, as I announced on Friday, we are still considered in “Outbreak” mode per Department of Health guidelines. In addition to suspending admissions to our Health Center, we now will suspend admissions to our Assisted Living apartments (this is for new people moving to TLRC for both the Health Center and the Assisted Living apartments). Visitations with Assisted Living and North Ridge residents will also be suspended until further notice.

As you are aware, cases continue to rise both in Pierce County and the country and we will remain vigilant with all protocols in order to keep our residents and employees safe. Your compliance with our protocols is appreciated and we will work as quickly as we can to restore admissions and visitations.

As always, you will be updated as the situation changes. Thank you for your support and understanding.
