

## MEMORANDUM

Date: December 13, 2020

To: TLRC Residents, Family Members and Employees

From: R Kevin McFeely, President & CEO

Re: Today's COVID-19 Case Update

As we continue to receive COVID test results, all Health Center resident test results have now been received. As a result of this, we report a total of fourteen (14) Health Center residents and five (5) Health Center staff members who have tested positive. As previously shared with you, these five (5) employees will not return to work until at least 10 days have passed from the onset of their symptoms and they are not exhibiting any symptoms. We have temporarily relocated all residents who have tested positive to the Alpine section of the Health Center in order to minimize additional spread of the COVID virus.

Regarding the Assisted Living area of our campus, our residents continue to be COVID free and the one (1) staff member who previously tested positive has met the established criteria to return to work.

Protocols continue to be in effect and as always, your compliance with them is greatly appreciated. Thanks for your kind words and gestures of support. Our staff is extremely appreciative for these acts of kindness.
